

# WEIGHSAFE

## LOAD N' WEIGH

### Portable Load Bars for Fork Trucks

### Turn your Forklift into a Mobile Weighing Machine

Introducing the **WEIGHSAFE LOAD N' WEIGH** portable fork scale system designed specifically for forklift trucks. The ultra low profile and easy installation makes them the perfect choice when accurate weighing is needed.

An accuracy of .1% of the lift truck capacity is typically achieved. Designed for heavy industrial use, the lift truck can weigh a load in less than 5 seconds. This will ensure your shipments will not exceed trailer/truck capacity.

The **WEIGHSAFE LOAD N' WEIGH** system will also totalise both the weight and number of lifts performed - which is easily accessed by a simple recall function on the wireless monitor.

An ultra slim, weatherproof, micro-processor based wireless weight indicator removes the need for cables from the load bars. The system indicator has a USB and RS 232 port for easy data access, the display is 20mm LCD with back light function.

DISTRIBUTED WORLDWIDE BY:

# LOAD N' WEIGH

## FEATURES

- Easy to install
- Easy to read
- External on/off switch
- No cabling
- Auto shut off
- Fork indication lamps
- Full digital calibration and function setting method
- Automatic zero tracking
- Zero, tare and print function keys
- Totalling function
- Clear and stable LCD display

## OPTIONAL

- Built in printer (580 Model)
- Data software for USB interface 580 model
- RS-232 output (280 & 580) models
- Wireless data transfer 580 model

## SPECIFICATIONS

### CONSTRUCTION MATERIAL

Load Bars (Mild Steel)

### H44 OPERATING RANGE

-10°C to 50°C

### POWER SUPPLY

Rechargeable batteries 7.4volt DC  
 Power consumption  
 Load Bars: 50hrs (under typical useage)  
 Indicator: 50hrs (under typical useage)

### SHIPPING WEIGHT

Weigh bar set with display (53kg)

The **WEIGHSAFE LOAD N' WEIGH** kit contains:

- 1 x Loadbar set (2 x weigh bars)
- 1 x Wireless weight display
- 1 x Battery chargers
- Operating and fitting information

### DISPLAY

ABS plastic enclosure

Radio frequency standard 2.4Ghz wireless module up 128 channels, 433 Mhz and 868 Mhz are available

### DIMENSIONS

Fits standard forklift trucks Class 2 and 3  
 Custom sizes are available  
 Capacity: 1,000Kg to 5,000kg  
 Graduation: 1kg/2kg
